KONE

ACCESS ESSENTIAL MAINTENANCE INFORMATION IN YOUR OWN SYSTEM

KONE Equipment Status Application Interface (API) enables building owners to integrate maintenance data into their own asset management system or building management system, removing the need for separate platforms.

Combining two innovative services

Efficient facility management decision making and improved end user experience. KONE leverages the power of cloud technology, machine learning and Artificial Intelligence (AI) to give customers access to equipment and service status data for their elevators and escalators. KONE Equipment Status API adds value to KONE 24/7 Connected Services by allowing building owners to easily integrate information into their own building management systems, enabling:

Access to transparent data about your equipment operation, performance, and service status

Timely alerts about problems to facilitate quick resolution

**Faster rescue of entrapped passengers**

Maximized equipment uptime
